
DESTINATION IMAGINATION

— PRESENTATION —

WHAT IS IT?

DI is an opportunity for students to work in groups of 7 or less to creatively solve a problem while also learning to solve a group of problems known as “instant challenge”.

Our regional competition is February 16.

What is it?

**What does it
look like???**

WHEN ARE THE MEETINGS?

Meetings are on Wednesdays from about 4:20-5:30. Students will be picked up in the back of school. As we get closer to competition, teams may need to meet more often, sometimes on Saturdays. We will start meeting on September 12. Our first meeting will be in the library.

IS THIS THE RIGHT FIT FOR MY CHILD?

DI is the right fit for a student that....

1. Is a creative problem solver.
2. Is willing to work with others.
3. Doesn't have to get their own way.
4. Is outgoing and willing to share ideas/talents.

What else do I need to know?

The biggest thing is that students and only students are to solve the problem. Well meaning adults are not to give ideas to the team members. For example, adults can teach the students to sew, but cannot tell them what the costumes should be made of or how a specific costume should look, and may not sew it for them. If students find they need materials for a backdrop, they need to figure out where to get it and ask an adult to get it. For example, if a child says, "We need wood." and a parent says they will go to Home Depot to get it, that is interference. So basically the team is on their own.

The school pays for our membership fees, but the team managers will need to collect some money for supplies. Usually about \$20 or so. It depends on the problem. Students will need snacks for the meetings. If we decide on team t-shirts, that may be another expense.

What are the challenges this year?

Engineering

Monster Effects

What are the problems this year?

Service Learning

Escape Artists

What are the challenges this year?

Technical

On Target

What are the challenges this year?

Improvational

Heads Up!
